

St John's CE (C) Primary Computing Whole School Curriculum – 2024-2025

Please note the units below do not always fully fit into a half term and will need to be started as soon as the previous unit has finished.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
EYFS	Introduce use of iPad, laptops, interactive whiteboard and cameras Taking selfies Purple Mash: Simple City Map Paint Mashcam	Use beebots and remote-control cars Purple Mash: Paint mashcam	Safer Internet Day Purple Mash passwords Paint Mashcam 2email	Ipad camera Purple Mash: Maths City garden Paint	Purple Mash Maths city Paint	Paint Mashcam: Explore 2publish Charanga: music composition
Year 1	Unit 1.1. Online Safety and PM (4 lessons) Unit 1.2 Grouping and Sorting (2 lessons)	Unit 1.3 Pictograms (3 lessons) Unit 1.4 Lego Builders (3 lessons)	Unit 1.5 Maze Explorers (4 lessons)	Unit 1.6 Animated Stories (5 lessons)	Unit 1.7 Coding (6 lessons)	Unit 1.7 Coding (6 lessons) Unit 1.9 Tech Outside School (2 lessons)
Year 2	Unit 2.2 Online Safety (3 lessons) Unit 2.5 Effective Searching (3 lessons)	Unit 2.1 Coding (6 lessons)	Unit 2.4 Questioning (5 lessons) Unit 2.6 Creating pictures (5 lessons)	Unit 2.3 Spreadsheets (6 lessons)	Unit 2.8 Presenting Ideas (4 lessons)	Unit 2.1 Coding RECAP (6 lessons)
Year 3	Unit 3.1 Coding (6 lessons) Unit 3.2 Online Safety (3 lessons)	Unit 3.3 Spreadsheets (6 lessons)	Unit 3.6 Branching databases (4 lessons)	Unit 3.5 Email (6 lessons)	Unit 3.9 Presenting (MS PowerPoint) (6 lessons)	Unit 3.10 Microbits (4 lessons) Unit 3.1 Coding RECAP

		Unit 3.4 Touch Typing (4 lessons)				(6 lessons)
Year 4	Unit 4.1 Coding (6 lessons) Unit 4.8 Hardware Investigators (2 lessons)	Unit 4.2 Online Safety (4 lessons) Unit 4.7 Effective searching (3 lessons)	Unit 4.6 Animation (3 lessons) Unit 4.5 Logo (4 lessons)	Unit 4.10 Intro to AI (4 lessons)	Unit 4.11 - Microbits (4 lessons)	Unit 4.1 Coding (6 lessons) RECAP
Year 5	Unit 5.2 Online Safety (3 lessons) Unit 5.1 Coding (6 lessons)	Unit 5.3 Spreadsheets (6 lessons)	Unit 5.4 Databases (4 lessons)	Unit 5.5 Game Creator (5 lessons)	Unit 5.8 Word Processing MS Word (8 lessons)	Unit 5.10 - Microbits (4 lessons)
Year 6	Unit 6.2 Online Safety (3 lessons) Unit 6.1 Coding (6 lessons)	Unit 6.5 Text Adventures (4 lessons)	Unit 6.4 Blogging (4 lessons)	Unit 6.6 Networks (3 lessons)	Unit 6.8 Binary (4 lessons)	Unit 6.9 Spreadsheets MS Excel (8 weeks)

Computing Domains:

Computer Science	Information Technology	Digital Literacy (including e-safety)
Understanding data representations and structures; algorithms, debugging, programming and coding.	The knowledge to create digital artefacts such as animations and 3D models. Providing knowledge of how technology is used in society and by specific sectors of it. The advantages of using digital methods to collate and share information	Knowledge of how to use digital technologies safely and effectively including creation, retrieval and sharing of information and other digital media.

Computing Curriculum Narrative

EYFS

Computing in the EYFS can mean:

- ✓ Taking a photo with a camera or tablet
- ✓ Searching for information on the internet
- ✓ Playing games on the interactive whiteboard
- ✓ Exploring an old typewriter or mechanical toys
- ✓ Using a Beebot
- ✓ Watching a video clip
- ✓ Listening to music
- ✓ Knowing the importance of e safety

Key Stage 1

Key stage 1 Pupils should be taught:

- ✓ understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions
- ✓ create and debug simple programs
- ✓ use logical reasoning to predict the behaviour of simple programs
- ✓ use technology purposefully to create, organise, store, manipulate and retrieve digital content
- ✓ recognise common uses of information technology beyond school
- ✓ use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.

Key Stage 2

Key stage 2 pupils should be taught:

- ✓ design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts
- ✓ use sequence, selection, and repetition in programs; work with variables and various forms of input and output
- ✓ use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs
- ✓ understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration
- ✓ use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content

- ✓ select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information
- ✓ use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.

Computing in EYFS

Subject:	Computing
Year Group:	Reception

Prior/Background Knowledge:

Children should start school: With some experience of using technology- tv, ipad, laptop, phone, camera etc

They should remember some of the rules to using equipment without an adult having to remind them.

Match their developing

ELGs linked to computing skills

Managing Self: Be confident to try new activities and show independence, resilience and perseverance in the face of challenge.

Explain the reasons for rules, know right from wrong and try to behave accordingly.

Creating with materials: Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function.

Autumn 1:

Introduce use of **iPad, laptops, interactive whiteboard** and **cameras**

Home corner: Children to have access to calculators, cameras, phones etc to use in their play

Technology all around us: children to discover the technology we use every day. Understand that technology can solve a problem. Homework to list all the technology in their home.

Ipads: children to take selfies for our welcome display

Purple Mash:

To explore the Simple City Map

Paint- homes and my family, Autumn tree, leaves and acorn, Harvest basket and veg box, Rangoli patterns/diva lamp

English- Purple Mash fruit bowl painting for Handa's Surprise **Mashcam:** Little Red Riding Hood

Autumn 2:

Use beebots and remote-control cars- to follow routes and maps. Linked to transport topic.

Purple Mash:

Simple City- garage Maths City- space

Paint- transport, fireworks, Hanukah, Christmas tree, stocking, Santa and plate, Pumpkin, Poppy

Use the **mashcam** to create a calendar to go home.

Mashcam: Astronaut/rocket and elf/santa.

Spring 1:

Safer Internet Day

Purple Mash:

Learn how to use **passwords**

Design a gingerbread man and other food. Explore the café in Simple City.

Paint: Winter tree, Chinese fan, lantern and dragon, design a superhero and a cape, people who help us.

Mashcam: superhero

Email: Email a local hero to find out more.

Spring 2:

Children will use the iPads to take photos of what they observe in the garden and also to track progress in growth of beans/frogspawn

Purple Mash:

Maths City garden

Paint: Spring tree, Garden painting + places garden, Easter egg Seder plate (Passover),

English: Purple Mash paint a castle (fantasy stories) Jack and beanstalk

Keeping safe:

PSED: Children know and talk about the different factors that support their overall health and wellbeing: sensible amounts of screen time. Parents are also told about the importance of children playing age-appropriate games

Safer Internet Day Children will learn:

- What is the internet: **homework** to list how they use the internet at home.
- To always have a grown-ups permission to use the internet
- Who to tell if they feel unsafe on the internet.
- To never tell anyone online personal details
- To never give their password to anyone.

Children will receive their Purple Mash passwords to help put this rule into practice.

Throughout the week read a variety of stories at story time to reiterate the safety rules: **digital duck (safer internet site)**, **Old MacDonald had a phone**, **#Goldilocks**, **Chicken Clicking**, **Buddy the Dog (Twinkl)**

Summer 1:

Purple Mash:

Maths city farm **Paint:** animals

Summer 2:

Purple Mash:

Paint: sea creatures, Summer tree, rainbow (Rainbow Day), pirate island and rock pool (places), Pirates etc,

Mashcam: Diver/pirate/submarine

English:

Explore 2publish- create own underwater adventure story

Charanga: Using ICT to compose a song as part of the music unit of work

ONGOING:

QR codes to listen to stories on iPads.

The IWB will be available throughout the day with different games on:

Purple mash: Maths: paint numbers and represent numbers, ladybird doubles, addition, number bonds, 1 more 1 less, shop on maths City, counting quizzes, ordering numbers quizzes, measuring, position and direction **Phonics:** Painting the letters, alphabet pairs, paint- clock, shapes and shape pictures

Phonics play

Paint for Eid mosque and mendhi, birthday cake- when a class birthday helping hands design a cake for them, wedding cake- if relevant

Key computing vocabulary:

Computer, iPad, laptop, phone, mouse, keyboard, selfie, password, safe, Internet, technology, electricity, charging

Continuous Provision:

IWB- constant

Ipads x1 afternoon a week

laptops x1 day a week

St John's Computing Medium Term Planning (using Purple Mash resources)

Yr group, Unit Title	Domain	Previous Learning	National Curriculum - Learning Questions	Tier 2 Vocabulary	Tier 3 Vocabulary
Year 1 Unit 1.1 Online Safety and PM	Digital Literacy	EYFS: <ul style="list-style-type: none"> • Use of 2Dos • Saving, opening and editing work • Sharing work • Copying and pasting • Mouse, keyboard and device skills 	<p>1. • Children can log in to Purple Mash using their own login.</p> <p>• Children have created their own avatar and understand why they are used.</p> <p>• Children can add their name to a picture they created on the computer.</p> <p>• Children are beginning to develop an understanding of ownership of work online.</p> <p>• Children can save work into the My Work folder in Purple Mash and understand that this is a private saving space just for their work.</p> <p>2. • Children can find their saved work in the Online Work area of Purple Mash.</p> <p>• Children can find messages that their teacher has left for them on Purple Mash.</p> <p>• Children can search Purple Mash to find resources.</p> <p>3. • Children will be able to use the different types of topic templates in the Topics section confidently.</p> <p>• Children will be confident with the functionality of the icons in the topic templates.</p> <p>• Children will know how to use the different icons and writing cues to add pictures and text to their work.</p> <p>4. • Children have explored the Tools section on Purple Mash and become familiar with some of the key icons: Save, Print, Open and New.</p> <p>• Children have explored the Games section and looked at Table Toons (2x tables).</p> <p>• Children can log out of Purple Mash when they have finished using it and know why that is important.</p>	<p>Alert</p> <p>Avatar</p> <p>Button</p> <p>Device</p> <p>File name</p> <p>Icon</p> <p>Log out</p> <p>Log in</p> <p>Menu</p> <p>My work area</p> <p>Notification</p> <p>Private</p> <p>Password</p> <p>Purple mash</p> <p>tools</p> <p>Saving</p> <p>Search</p>	

Year 1 Unit 1.2 Grouping and Sorting	Computer science	Unit 1.1 Online Safety and PM • General use of Purple Mash • Systematic, logical thinking to solve problems and achieve aims • Use of 2Dos • Saving, opening and editing work • Sharing work	1. • Children can sort various items offline using a variety of criteria. 2. • Children have used Purple Mash activities to sort various items online using a variety of criteria.	Criteria Groups sort	
Year 1 Unit 1.3 Pictograms	Information technology	Unit 1.2 • Sorting data according to criteria	1. • Children can discuss and illustrate the transport used to travel to school. • Children can contribute to the collection of class data. • Children have used these illustrations to create a simple pictogram 2. • Children can contribute to a class pictogram. • Children can discuss what the pictogram shows. 3. • Children can collect data from rolling a die 20 times and recording the results. • Children can represent the results as a pictogram.	Collect data Compare Data Pictogram Record results Title	
Year 1 Unit 1.4 Lego Builders	Computer science	Unit 1.1 Online Safety and PM • General use of Purple Mash • Systematic, logical thinking to solve problems and achieve aims • Use of 2Dos • Saving, opening and editing work • Sharing work	1. • Children know that to achieve the effect they want when building something, they need to follow accurate instructions. • Children know that by following the instructions correctly, they will get the correct result. • Children know that an algorithm is a precise, step-by-step set of instructions used to solve a problem or achieve an objective. 2. • Children can follow instructions in a computer program. • Children can explain the effect of carrying out a task with no instructions. • Children know that computers need precise instructions to follow. • Children know that an algorithm written	Algorithm Code Computer Debugging Instructions Program	

			<ul style="list-style-type: none"> 3. • Children understand how the order in which the steps of a recipe are presented affects the outcome. • Children can organise instructions for a simple recipe. • Children know that correcting errors in an algorithm or program is called 'debugging'. 		
Year 1 Unit 1.5 Maze Explorers	Computer science	Unit 1.4 Lego Builders <ul style="list-style-type: none"> • Logical decision making • Sequencing instructions • Following instructions 	<ol style="list-style-type: none"> 1. • Children know how to use the direction keys in 2Go to move forwards, backwards, left and right. • Children know how to add a unit of measurement to the direction in 2Go Challenge 2. • Children know how to undo their last move. • Children know how to move their character back to the starting point. <ol style="list-style-type: none"> 2. Children can use diagonal direction keys to move the characters in the right direction. • Children know how to create a simple algorithm. • Children know how to debug their algorithm. <ol style="list-style-type: none"> 3. • Children can use the additional direction keys to create a new algorithm. • Children can challenge themselves by using the longer algorithm to complete challenges. <ol style="list-style-type: none"> 4. • Children can change the background images in their chosen challenge and save their new challenge. • Children have tried each other's challenges. 	Algorithm Challenge Command Direction Instruction Left and right Route Undo Unit	
Year 1 Unit 1.6 Animated Stories	Information technology	Unit 1.1 Online Safety and PM <ul style="list-style-type: none"> • General use of Purple Mash • Design: avatar creation • Paint Projects: use of the simple paint tools 	<ol style="list-style-type: none"> 1. • Children know the difference between a traditional book and an e-book. • Children can use the different drawing tools to create a picture on the page. • Children can add text to a page. <ol style="list-style-type: none"> 2. • Children can open previously saved work. • Children can add an animation to a page. • Children can play the pages created. 	Animation Background Clip-art gallery E-book Edit Font Sound Sound effect Text	

			<ul style="list-style-type: none"> • Children can save changes and overwrite the file. <p>3. • Children can add a sound to the page.</p> <ul style="list-style-type: none"> • Children can add voice recording to the page. • Children can create music for a page. <p>4. • Children can add a background to the page.</p> <ul style="list-style-type: none"> • Children can use the additional drawing tools on My Story mode. • Children can change the font style and size. <p>5. • Children can use the copy and paste function to add more pages to their animated e-book.</p> <ul style="list-style-type: none"> • Children can share their e-books on a class story book display board. 		
Year 1 Unit 1.7 Coding	Computer science	<p>Unit 1.4 Lego Builders</p> <ul style="list-style-type: none"> • Algorithms • Logical decision making • Sequencing instructions • Following instructions <p>Unit 1.5 Maze Explorers</p> <ul style="list-style-type: none"> • Coding a 'turtle' • Creating programs using sequencing and repeat. • Visual use of the Logo programming language. • Program logic and structure 	<p>1. • Children can give and follow instructions.</p> <ul style="list-style-type: none"> • Children can draw symbols to represent instructions. • Children can arrange code blocks to create a set of instructions. <p>2. • Children can create a program using code blocks.</p> <ul style="list-style-type: none"> • Children can use object and action code blocks. <p>3. • Children can create a simple program using code blocks. • Children can use event, object and action code blocks.</p> <p>4. • Children can create a simple program using code blocks. • Children can use event, object and action code blocks.</p> <ul style="list-style-type: none"> • Children can notice when their code executes when their program is run. <p>5. • Children can edit a scene by adding, deleting and moving objects.</p>	Action Algorithm Background Code Command Debug/debugging Event Execute Input Instructions Object Output Properties Run Scale Scene Sound When clicked	

			<ul style="list-style-type: none"> • Children can change the size of objects using the attributes (properties) table. <p>6. • Children can create a design plan for their Free Code Scene program.</p> <ul style="list-style-type: none"> • Children can use code to make the program they have designed work. 		
Year 1 Unit 1.9 Tech Outside School	Digital literacy	Unit 1.1 Online Safety and PM • General use of Purple Mash	<p>1. • Children understand what is meant by 'technology'. • Children have considered types of technology used in school and out of school.</p> <p>2. • Children have recorded 4 examples of where technology is used away from school.</p>	Computer Technology	

Yr group, Unit Title	Domain	Previous Learning	National Curriculum – Learning Questions	Tier 2 Vocabulary	Tier 3 Vocabulary
Year 2 Unit 2.2. Online Safety	Digital literacy	<p>Unit 1.1 Online Safety and PM</p> <ul style="list-style-type: none"> • Safe logins • Concept of privacy • Concept of ownership • The need to logout <p>Unit 1.9 Technology outside school</p> <ul style="list-style-type: none"> • Developing ideas about the concept of technology that we are surrounded by and its purpose 	<p>1. • Children can use the search facility to refine searches on Purple Mash by year group and subject.</p> <ul style="list-style-type: none"> • Children can share the work they have created to a display board. • Children understand that the teacher approves work before it is displayed. • Children are beginning to understand how things can be shared electronically for others to see both on Purple Mash and the Internet. <p>2. • Children know that Email is a form of digital communication.</p> <ul style="list-style-type: none"> • Children understand how 2Repond can teach them how to use email. • Children can open and send an email to a 2Respond character. • Children have discussed their own experiences and understanding of what email is used for. • Children have discussed what makes us feel happy and what makes us feel sad. <p>3. • Children can explain what a digital footprint is.</p> <ul style="list-style-type: none"> • Children can give examples of things that they would not want to be in their digital footprint. 	<p>Attachment</p> <p>Digital footprint</p> <p>Email</p> <p>Filter</p> <p>Internet</p> <p>Personal information</p> <p>Private information</p> <p>Search</p> <p>Secure</p> <p>Sharing</p>	
Year 2 Unit 2.5 Effective Searching	Digital literacy	<p>Unit 1.1 Online Safety and PM</p> <ul style="list-style-type: none"> • Safe logins • Using Purple Mash search functionality <p>Unit 1.6 Technology Outside School</p> <ul style="list-style-type: none"> • Developing ideas about the concept of technology that we are surrounded by and its purpose 	<p>1. • Children can recall the meaning of key Internet and searching terms.</p> <ul style="list-style-type: none"> • Children have completed a quiz about the Internet. <p>2. • Children can identify the basic parts of a web search engine search page.</p> <ul style="list-style-type: none"> • Children have learnt to read a web search results page. • Children can search the Internet for answers to a quiz. 	<p>Digital footprint</p> <p>Domain</p> <p>Internet</p> <p>Network</p> <p>Search engine</p> <p>Web address</p> <p>Web page</p> <p>World wide web</p>	

		Unit 2.2 Online Safety <ul style="list-style-type: none"> • Sharing to a display board • Sharing online • Digital footprint 	3. • Children have created a leaflet to consolidate knowledge of effective Internet searching.	Web site	
Year 2 Unit 2.1 Coding	Computer science	Unit 1.7 Coding <ul style="list-style-type: none"> • Introducing block coding • Objects and actions • Events (Click event, sound output) • Executing a program • Design view: Planning Unit 1.4 Lego Builders <ul style="list-style-type: none"> • Algorithms • Logical decision making • Sequencing instructions • Following instructions Unit 1.5 Maze Explorers <ul style="list-style-type: none"> • Coding a 'turtle' • Creating programs using sequencing and repeat • Visual use of the Logo programming language • Program logic and structure 	1. • Children can explain that an algorithm is a set of instructions. • Children can describe the algorithms they created. • Children can explain that for the computer to make something happen, it needs to follow clear instructions. 2. • Children can plan an algorithm that includes collision detection. • Children can create a program using collision detection. • Children read blocks of code and predict what will happen when it is run. 3. • Children can create a program that uses a timer-after command. • Children can explain what the timer-after command does in their program. • Children can predict what will happen in a program that includes a timer-after command. 4. • Children can create a computer program that includes different object types. • Children can modify the attributes (properties) of an object. • Children can use different events in their program to make objects move. 5. • Children can create a computer program that includes a button object. • Children can explain what a button does in their program. • Children can modify the attributes (properties) of a button to fit their program design. 6. • Children can explain what debug (debugging) means.	Action Algorithm Background Bug Button Click events Collision detection Command Debug- debugging Collision detection Event Execute Implement Instructions Interaction Interval Object Output Properties Run	

			<ul style="list-style-type: none"> • Children can use a design document to start debugging a program. • Children can debug simple programs. 		
Year 2 Unit 2.4 Questioning	Information technology	Unit 1.2 Grouping and Sorting <ul style="list-style-type: none"> • Sorting data according to criteria Unit 1.3 Pictograms <ul style="list-style-type: none"> • Collecting and presenting data in a picture format 	1. • Children understand that the information on pictograms cannot be used to answer more complicated questions. 2. • Children have used a range of yes/no questions to separate different items. <ul style="list-style-type: none"> • Children understand what is meant by a binary tree. • Children have designed a binary tree to sort pictures of children. 3. • Children understand that questions are limited to 'yes' and 'no' in a binary tree. <ul style="list-style-type: none"> • Children understand that the user cannot use 2Question to find out answers to more complicated questions. • Children have matched 2Simple item pictures to names using a binary tree 4. • Children understand what is meant by a database. <ul style="list-style-type: none"> • Children have used a database to answer simple and more complex search questions. 	Binary tree Data Database Field Pictogram Question Record Search Sort	
Year 2 Unit 2.6 Creating Pictures	Information technology	Unit 1.1. Online Safety and PM <ul style="list-style-type: none"> • General use of Purple Mash • Design: avatar creation • Paint Projects: use of the simple paint tools Unit 1.6 Animated Story Books <ul style="list-style-type: none"> • 2Create a Story: Painting tool. • Animating images using built in effects • Concept of background (static) and foreground (can move) 	1. • Children can describe the main features of impressionist art. <ul style="list-style-type: none"> • Children can use 2Paint a Picture to create art based upon this style 2. • Children can explain what pointillism is. <ul style="list-style-type: none"> • Children can use 2Paint a Picture to create art based upon this style. 3. • Children can describe the main features of Piet Mondrian's work. <ul style="list-style-type: none"> • Children can use 2Paint a Picture to art based upon his style. 	Art Fill Impressionism Palette Pointillism Style Surrealism	

			<p>4. • Children can describe the main features of art that uses repeating patterns.</p> <ul style="list-style-type: none"> • Children can use 2Paint a Picture to create art by repeating patterns in a variety of ways. • Children can combine more than one effect in 2Paint a Picture to enhance patterns. <p>5. • Children can describe surrealist art.</p> <ul style="list-style-type: none"> • Children can use the eCollage function in 2Paint a Picture to create surrealist art using drawing and clipart. 		
<p>Year 2</p> <p>Unit 2.3</p> <p>Spreadsheets</p>	<p>Information technology</p>	<p>Unit 1.3 Pictograms</p> <ul style="list-style-type: none"> • What is data? • Representing data 	<p>1. • Children can navigate around a spreadsheet.</p> <ul style="list-style-type: none"> • Children can explain what rows and columns are. • Children can enter data into cells. <p>2. • Children can use the menu buttons to add different types of images.</p> <ul style="list-style-type: none"> • Children can use the apparatus images to solve maths questions. • Children can use the 'move cell' tool so that images can be dragged around the spreadsheet <p>3. • Children can use the clipart gallery to add images to a spreadsheet.</p> <ul style="list-style-type: none"> • Children can give images a value. • Children can make use of the values given to images in calculations. <p>4. • Children can use tools in a spreadsheet to automatically total rows and columns.</p> <ul style="list-style-type: none"> • Children can use a spreadsheet to solve a mathematical puzzle <p>5. • Children can use the count tool to count items.</p> <ul style="list-style-type: none"> • Children can use the speak tool so that the items are counted out loud 	<p>Calculations</p> <p>Cell</p> <p>Column</p> <p>Data</p> <p>Data table</p> <p>Drag</p> <p>Equals</p> <p>Spreadsheet</p> <p>Graph</p> <p>Row</p> <p>Equals tool</p> <p>Total</p>	

			6. • Children can create a table of data on a spreadsheet. • Children can use a spreadsheet program to automatically create charts and graphs from data.		
Year 2 Unit 2.8 Presenting ideas	Information technology	Unit 1.6 Animated Story Books • Creating text and the use of illustrations • Genre: animated picture book Unit 2.6 Creating Pictures • Presenting ideas in art form • 2Paint a Picture: art effects, collage effects	1. • Children have examined a traditional tale presented as a mind map, as a quiz, as an e-book and as a fact file. • Children know that digital content can be represented in many forms. 2. • Children have made a quiz about a story using 2Quiz. • Children can talk about their work and make improvements to solutions based on feedback received. 3. • Children have extracted information from a 2Connect file to make a publisher fact file on a non-fiction topic. • Children have added appropriate clipart. • Children have added an appropriate photo. • Children know that data can be structured in tables to make it useful. 4. • Children can use a variety of software to manipulate and present digital content and information. • Children can collect, organise and present data and information in digital content. • Children can create digital content to achieve a given goal by combining software packages.	E-book Fact file Fiction Mind map Node Non-fiction Presentation Quiz	

Yr group, Unit Title	Domain	Previous Learning	National Curriculum - Learning Questions	Tier 2 Vocabulary	Tier 3 Vocabulary
Year 3 Unit 3.1 Coding	Computer science	Unit 2.1 Coding <ul style="list-style-type: none"> • Algorithms • Collision detection • Timers • Object types • Buttons • Debugging Unit 2.4 Questioning <ul style="list-style-type: none"> • Logical decision processing. • Forward planning to achieve a solution 	<p>1. • Children can read and explain a flowchart</p> <ul style="list-style-type: none"> • Children can use a flowchart to create a computer program. • Children can create a computer program that uses click events and timers. <p>2. • Children can create a program that uses a timer-after command</p> <ul style="list-style-type: none"> • Children can create a program that uses a timer-every command • Children understand there can be different ways to solve a problem. <p>3. • Children understand how the turtle object moves.</p> <ul style="list-style-type: none"> • Children can use the repeat command with an object. • Children can create a computer program that includes use of the repeat command. <p>4. • Children can create computer programs using prior knowledge.</p> <ul style="list-style-type: none"> • Children can run, test and debug their programs. • Children can consider nesting when debugging their programs. <p>5/6. • Children can use the attributes (properties) table to set the attributes of objects.</p> <ul style="list-style-type: none"> • Children can plan their scene and code before they create their program. • Children can confidently make several different things happen in a program. 	Action Alert Algorithm Background Bug Button Click event Code Collision detection event Command Debug Debugging Event Flowchart Implement Input Interval Nesting Object Predict Properties Repeat Run Scene Sequence Test Timer Turtle object	
Year 3 Unit 3.2 Online Safety	Digital literacy	Unit 2.2 Online Safety <ul style="list-style-type: none"> • Share to a displayboard • Approval process • Sharing online 	<p>1. • Children understand what makes a good password for use on the Internet. Children are beginning to realise the outcomes of not keeping passwords safe.</p>	Appropriate Blog Inappropriate Internet	

		<ul style="list-style-type: none"> • Email simulations • emotional impact of communications • digital footprint <p>Unit 2.5 Effective Searching</p> <ul style="list-style-type: none"> • Search engine • Digital footprint • Privacy 	<ul style="list-style-type: none"> • Children can contribute to a concept map of all the different ways they know that the Internet can help us to communicate. • Children have contributed to a class blog with clear and appropriate messages. • Extension: Children understand that passwords help to limit who can see personal / private / confidential information. <p>2. • Children understand that some information held on websites may not be accurate or true.</p> <ul style="list-style-type: none"> • Children are beginning to understand how to search the Internet and how to think critically about the results that are returned. • Children have accessed and assessed a 'spoof' website. • Children have created their own 'spoof' webpage mock-up. • Children have shared their 'spoof' web page on a class display board. • Extension: Children evaluate facts from a website and explain how they fact checked the information that was presented. <p>3. • Children can identify some physical and emotional effects of playing/watching inappropriate content/games.</p> <ul style="list-style-type: none"> • Children relate cyberbullying to bullying in the real-world and have strategies for dealing with online bullying including screenshot and reporting. 	Password Personal information Permission Reputable source Reliable source Spoof Verify Vlog Website

Computing Progression Map – Progress measures for working at the 'Expected' Level

<u>KS1</u>	<u>Reception</u>	<u>Year 1</u>	<u>Year 2</u>	<u>KS2</u>	<u>Year 3</u>	<u>Year 4</u>	<u>Year 5</u>	<u>Year 6</u>
Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions		Children understand that an algorithm is a set of instructions used to solve a problem or achieve an objective. They know that a computer program turns an algorithm into code that the computer can understand	Children can explain that an algorithm is a set of instructions to complete a task. When designing simple programs, children show an awareness of the need to be precise with their algorithms so that they can be successfully converted into code.	Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs.	Children's designs for their programs show that they are thinking of the structure of a program in logical, achievable steps and absorbing some new knowledge of coding structures. For example, repetition and use of timers. They make good attempts to 'step through' more complex code in order to identify errors in algorithms and can correct this. e.g., they can 'read' programs with several steps and predict the outcome accurately.	Children's designs for their programs show that they are thinking of the structure of a program in logical, achievable steps and absorbing some new knowledge of coding structures. For example, 'IF' statements, repetition and variables. They can trace code and use step-through methods to identify errors in code and make logical attempts to correct this. In programs such as Logo, they can 'read' programs with several steps and predict the outcome accurately.	When children code, they are beginning to think about their code structure in terms of the ability to debug and interpret the code later, e.g. the use of tabs to organise code and the naming of variables	Children are able to interpret a program in parts and can make logical attempts to put the separate parts of a complex algorithm together to explain the program as a whole
Create and debug simple programs.		Children can work out what is wrong with a simple algorithm when the steps are out of order, e.g. The	Children can create a simple program that achieves a specific purpose. They can also	Design, write and debug programs that accomplish specific goals, including	Children can turn a simple real-life situation into an algorithm for a program by deconstructing it	When turning a real-life situation into an algorithm, the children's design shows that they are thinking	Children may attempt to turn more complex reallife situations into algorithms for a program by	Children are able to turn a more complex programming task into an algorithm by identifying

		<p>Wrong Sandwich in Purple Mash and can write their own simple algorithm, e.g. Colouring in a Bird activity. Children know that an unexpected outcome is due to the code they have created and can make logical attempts to fix the code, e.g. Bubbles activity in 2Code</p>	<p>identify and correct some errors, e.g. Debug Challenges: Chimp. Children's program designs display a growing awareness of the need for logical, programmable steps.</p>	<p>controlling or simulating physical systems; solve problems by decomposing them into smaller parts</p>	<p>into manageable parts.</p> <p>Their design shows that they are thinking of the desired task and how this translates into code.</p> <p>Children can identify an error within their program that prevents it following the desired algorithm and then fix it</p>	<p>of the required task and how to accomplish this in code using coding structures for selection and repetition. Children make more intuitive attempts to debug their own programs.</p>	<p>deconstructing it into manageable parts. Children are able to test and debug their programs as they go and can use logical methods to identify the approximate cause of any bug but may need some support identifying the specific line of code.</p>	<p>the important aspects of the task (abstraction) and then decomposing them in a logical way using their knowledge of possible coding structures and applying skills from previous programs. Children test and debug their program as they go and use logical methods to identify the cause of bugs, demonstrating a systematic approach to try to identify a particular line of code causing a problem.</p>
<p>Use logical reasoning to predict the behaviour of simple programs.</p>		<p>When looking at a program, children can read code one line at a time and make good attempts to envision the bigger picture of the overall effect of the program. Children can, for example, interpret where the turtle in 2Go</p>	<p>Children can identify the parts of a program that respond to specific events and initiate specific actions. For example, they can write a cause and effect sentence of what will happen in a program</p>	<p>Use sequence, selection and repetition in programs; work with variables and various forms of input and output.</p>	<p>Children demonstrate the ability to design and code a program that follows a simple sequence.</p> <p>They experiment with timers to achieve repetition effects in their programs.</p>	<p>Children's use of timers to achieve repetition effects are becoming more logical and are integrated into their program designs. They understand 'IF statements' for selection and attempt to combine these with other coding</p>	<p>Children can translate algorithms that include sequence, selection and repetition into code with increasing ease and their own designs show that they are thinking of how to accomplish the set task in code</p>	<p>Children translate algorithms that include sequence, selection and repetition into code and their own designs show that they are thinking of how to accomplish the set task in code utilising such structures,</p>

		challenges will end up at the end of the program.			Children are beginning to understand the difference in the effect of using a timer command rather than a repeat command when creating repetition effects.	structures including variables to achieve the effects that they design in their programs. As well as understanding how variables can be used to store information while a program is executing, they are able to use and manipulate the value of variables. Children can make use of user inputs and outputs such as 'print to screen'. e.g. 2Code	utilising such structures. They are combining sequence, selection and repetition with other coding structures to achieve their algorithm design	including nesting structures within each other. Coding displays an improving understanding of variables in coding, outputs such as sound and movement, inputs from the user of the program such as button clicks and the value of functions
Use technology purposefully to create, organise, store, manipulate and retrieve digital content.		Children are able to sort, collate, edit and store simple digital content e.g. children can name, save and retrieve their work and follow simple instructions to access online resources, use Purple Mash 2Quiz example (sorting shapes), 2Code design mode (manipulating backgrounds) or	Children demonstrate an ability to organise data using, for example, a database such as 2Investigate and can retrieve specific data for conducting simple searches. Children are able to edit more complex digital data such as music compositions within 2Sequence. Children are confident when	Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing,	Children can collect, analyse, evaluate and present data and information using a selection of software, e.g. using a branching database (2Question), using software such as 2Graph. Children can consider what software is most appropriate for a given task. They can create purposeful content to attach	Children are able to make improvements to digital solutions based on feedback. Children make informed software choices when presenting information and data. They create linked content using a range of software such as 2Connect and 2Publish+.	Children are able to make appropriate improvements to digital solutions based on feedback received and can confidently comment on the success of the solution. e.g. creating their own program to meet a design brief using 2Code. They objectively review solutions from others. Children are able to collaboratively	Children make clear connections to the audience when designing and creating digital content. The children design and create their own blogs to become a content creator on the Internet, e.g. 2Blog. They are able to use criteria to evaluate the quality of digital solutions and are able to identify improvements,

		using pictogram software such as 2Count.	creating, naming, saving and retrieving content. Children use a range of media in their digital content including photos, text and sound	evaluating and presenting data and information.	to emails, e.g. 2Respond.	community, i.e. using Virtual Display Boards.	create content and solutions using digital features within software such as collaborative mode. They are able to use several ways of sharing digital content, i.e. 2Blog, Display Boards and 2Email.	making some refinements
				Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content.	Children can carry out simple searches to retrieve digital content. They understand that to do this, they are connecting to the internet and using a search engine such as Purple Mash search or internet-wide search engines.	Children understand the function, features and layout of a search engine. They can appraise selected webpages for credibility and information at a basic level	Children search with greater complexity for digital content when using a search engine. They are able to explain in some detail how credible a webpage is and the information it contains	Children readily apply filters when searching for digital content. They are able to explain in detail how credible a webpage is and the information it contains. They compare a range of digital content sources and are able to rate them in terms of content quality and accuracy. Children use critical thinking skills in everyday use of online communication
Recognise common uses of information technology beyond school.		Children understand what is meant by technology and can identify a variety of	Children can effectively retrieve relevant, purposeful digital content using a search engine.	Understand computer networks, including the internet; how they can	Children can list a range of ways that the Internet can be used to provide different methods of	Children recognise the main component parts of hardware which allow computers to join	Children understand the value of computer networks but are also aware of the main dangers.	Children understand and can explain in some depth the difference between the

		examples both in and out of school. They can make a distinction between objects that use modern technology and those that do not e.g. a microwave vs. a chair.	They can apply their learning of effective searching beyond the classroom. They can share this knowledge, e.g. 2Publish example template. Children make links between technology they see around them, coding and multimedia work they do in school e.g. animations, interactive code and programs.	provide multiple services, such as the World Wide Web, and the opportunities they offer for communication and collaboration.	communication. They can use some of these methods of communication, e.g. being able to open, respond to and attach files to emails using 2Email. They can describe appropriate email conventions when communicating in this way.	and form a network. Their ability to understand the online safety implications associated with the ways the internet can be used to provide different methods of communication is improving.	They recognise what personal information is and can explain how this can be kept safe. Children can select the most appropriate form of online communications contingent on audience and digital content, e.g. 2Blog, 2Email, Display Boards.	internet and the World Wide Web. Children know what a WAN and LAN are and can describe how they access the Internet in school
Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.		Children understand the importance of keeping information, such as their usernames and passwords, private and actively demonstrate this in lessons. Children take ownership of their work and save this in their own private space such as their My Work folder on Purple Mash.	Children know the implications of inappropriate online searches. Children begin to understand how things are shared electronically such as posting work to the Purple Mash display board. They develop an understanding of using email safely by using 2Respond activities on Purple Mash and know ways of reporting inappropriate behaviours and	Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concern about content and contact.	Children demonstrate the importance of having a secure password and not sharing this with anyone else. Furthermore, children can explain the negative implications of failure to keep passwords safe and secure. They understand the importance of staying safe and the importance of their conduct when using familiar	Children can explore key concepts relating to online safety using concept mapping such as 2Connect. They can help others to understand the importance of online safety. Children know a range of ways of reporting inappropriate content and contact	Children have a secure knowledge of common online safety rules and can apply this by demonstrating the safe and respectful use of a few different technologies and online services. Children implicitly relate appropriate online behaviour to their right to personal privacy and mental wellbeing of themselves and others	Children demonstrate the safe and respectful use of a range of different technologies and online services. They identify more discreet inappropriate behaviours through developing critical thinking, e.g. 2Respond activities. They recognise the value in preserving their privacy when online for their

			content to a trusted adult.		communication tools such as Email in Purple Mash. They know more than one way to report unacceptable content and contact.			own and other people's safety.
