# Maths Calculation Policy

# Addition

	Concrete	Pictorial	Abstract
Adding two groups together	Use double sided counters and ten frames to add two numbers together.  Numicon used to explore what happens when you add two groups.	Children draw pictures to help them solve addition problems	3+4=7 Children use ten frames/ numicon/counters to find the answer to written calculations.  1+5=6
Combining two parts to make a whole: part- whole model	Use part, part whole model. Use cubes to add two numbers together as a group or in a bar.	Use pictures to add two numbers together as a group or in a bar.  8 1 3 5 part whole 2 2 8 1 2 8 1	8 = 5 + 3 $5 + 3 = 8$ Use the part part whole diagram as shown above to move into the abstract. Include missing number questions to support varied fluency: $8 = ? + 3$ $5 + ? = 8$
Starting at the bigger number and counting on	Start with the larger number on the bead string and then count on to the smaller number I by I to find the answer.	12 + 5 = 17 Start at the larger number on the number line and count on in ones or in one jump to find the answer.	5 + 12 = 17 Place the larger number in your head and count on the smaller number to find your answer.

	Concrete	Pictorial	Abstract
Combining two parts to make a whole: part- whole model	Use part, part whole model. Use cubes to add two numbers together as a group or in a bar.	Use pictures to add two numbers together as a group or in a bar.  8 1 5 whole 2	8 = 5 + 3 5 + 3 = 8  Use the part part whole diagram as shown above to move into the abstract. Include missing number questions to support varied fluency: 8 = ? + 3 5 + ? = 8
Starting at the bigger number and counting on	Start with the larger number on the bead string and then count on to the smaller number I by I to find the answer.	12 + 5 = 17 Start at the larger number on the number line and count on in ones or in one jump to find the answer.	5 + 12 = 17 Place the larger number in your head and count on the smaller number to find your answer.
Regrouping to make 10.	Start with the bigger number and use the smaller number to make IO. Use ten frames.	Use pictures or a number line. Regroup or partition the smaller number using the part, part whole model to make 10.	7 + 4= 11 If I am at seven, how many more do I need to make 10? How many more do I add on now?
Adding three single digits	4 + 7 + 6= 17 Put 4 and 6 together to make 10. Add on 7.		4+7+6 = 10+7  Combine the two numbers that make 10 and then add on the remainder.

	Following on from making IO, make IO with 2 of the digits (if possible) then add on the third digit.	Add together three groups of objects. Draw a picture to recombine the groups to make 10.	
Represent & use number bonds and related subtraction facts within 20		Once 2 mare falls  5 + 2 =	Include missing number questions: 8 = ? + 3 5 + ? = 8 Emphasis should be on the language 'I more than 5 is equal to 6.' '2 more than 5 is 7.' '8 is 3 more than 5.'

Adding multiples of ten	50= 30 + 20  Model using dienes and bead strings	3 tens + 5 tens =	20 + 30 = 50 70 = 50 + 20 40 + $\square$ = 60
Use known number facts Part, part whole	Children explore ways of making numbers within 20	Use representations for base ten.  20	Explore commutativity of addition by swapping the addends to build a fact family. Explore the concept of the inverse relationship of addition and subtractions and use this to check calculations.
Using known facts		+ : = ::	3 + 4 = 7  leads to  30 + 40 = 70  leads to  300 + 400 = 700
Bar model	3 + 4 = 7	7 + 3 = IO	23 25 ? 23 + 25 = 48

Add a two digit number and ones	17 + 5 = 22 Use ten frame to make 'magic ten  Children explore the pattern. $17 + 5 = 22$ $27 + 5 = 32$	16 + 7 16 20 23 16 20 23	Explore related facts  17 + 5 = 22  5 + 17 = 22  22—17 = 5  22—5 = 17  Lead into recording in column format, to reinforce place value and prepare children for formal written methods with larger values
Add a 2 digit number and tens	25 + 10 = 35 Explore that the ones digit does not change	Use part part whole and number line to model.  27 + 30  10 + 10 + 10	27 + 10 = 37 27 + 20 = 47 $27 + \Box = 57$
Add three I-digit numbers	Combine to make 10 first if possible, or bridge 10 then add third digit	Regroup and draw representation $+ = 15$	4+7+6 = 10+7  = 17  Combine the two numbers that make/bridge ten then add on the third.

#### Subtraction

	Concrete	Pictorial	Abstract
Taking away ones.	Use physical objects, counters, cubes etc to show how objects can be taken away.  4-2 = 2  6-4 = 2	Cross out drawn objects to show what has been taken away. $15 - 3 = \boxed{12}$	7—4 = 3 16—9 = 7
Counting back	Move objects away from the group, counting backwards.  Move the beads along the bead string as you count backwards.	5 - 3 = 2 Count back in ones using a number line.	Put 13 in your head, count back 4. What number are you at?

Concrete	Pictorial	Abstract
Use physical objects, counters, cubes etc to show how objects can be taken away.  42 = 2	Cross out drawn objects to show what has been taken away.	7—4 = 3
6—4 = 2	15-3 = 12	16—9 = 7
	5-3=2	Put 13 in your head, count back 4. Whatnumber are you at?
Move objects away from the group, counting backwards.	Count back in ones using a number line.	
Move the beads along the bead		
backwards.		
Compare objects and amounts	Count on using a number line to find the	Hannah has12 sweets and her sister has 5.
7 'Seven is 3 more than four'  4 'I am 2 years older than my	difference.	How many more does Hannah have than her sister?
S Pendis  3 Erasers 2	0 1 2 3 4 5 6 7 8 9 10 11 12	
	Use physical objects, counters, cubes etc to show how objects can be taken away.   2 = 2	Use physical objects, counters, cubes etc to show how objects can be taken away.  4 - 2 = 2  Move objects away from the group, counting backwards.  Move the beads along the bead string as you count backwards.  Compare objects and amounts  T am 2 years older than my sister.  Streams 2  Cross out drawn objects to show what has been taken away.  Count back in ones using a number line.  Count back in ones using a number line to find the difference.

Represent and use number bonds and related subtraction facts within 20 Include subtracting zero Part Part Whole Model	Link to addition. Use PPW model to model the inverse.  If 10 is the whole and 6 is one of the parts, what s the other part?  10—6 = 4	Use pictorial representations to show the part.	Move to using numbers within the part whole model.  5  12  7  Include missing number problems: 12 - ? = 5 7 = 12 - ?
Make 10	14—9  Make I4 on the ten frame. Take 4 away to make ten, then take one more away so that you have taken 5.	Jump back 3 first, then another 4. Use ten as the stopping point.	I6—8 How many do we take off first to get to IO? How many left to take off?
Bar model Including the inverse operations.	5—2 = 3		8 2   O = 8 + 2    O = 2 + 8    O - 2 = 8    O - 8 = 2

	Concrete	Pictorial	Abstract
Regroup a ten into ten ones		20 – 4 =	20 - 4 = 16
	Use a PV chart to show how to change a		
	ten into ten ones, use the term 'take and make'		
Partitioning to subtract without regrouping.	34—13 = 21	Children draw representations of Dienes and cross off.	l+3—2I = 22
	Use Dienes to show how to partition the number when subtracting without regrouping.		
Make ten strategy Progression should be crossing one ten,	28 30 34	76 80 90 93 'counting on' to find 'difference'	93—76 = 17
crossing	3428	Use a number line to count on to next ten	
more than one ten,	Use a bead bar or bead strings to model	and then the rest.	
crossing the hundreds.	counting to next ten and the rest.	93 80 I3 90 3 <u>- 70 6</u>	
		10 7	

Subtract with	33 - 15 =	33-I5 =	33-15 = 18
regrouping		Draw base 10 with exchange	
	Base 10 with exchange		

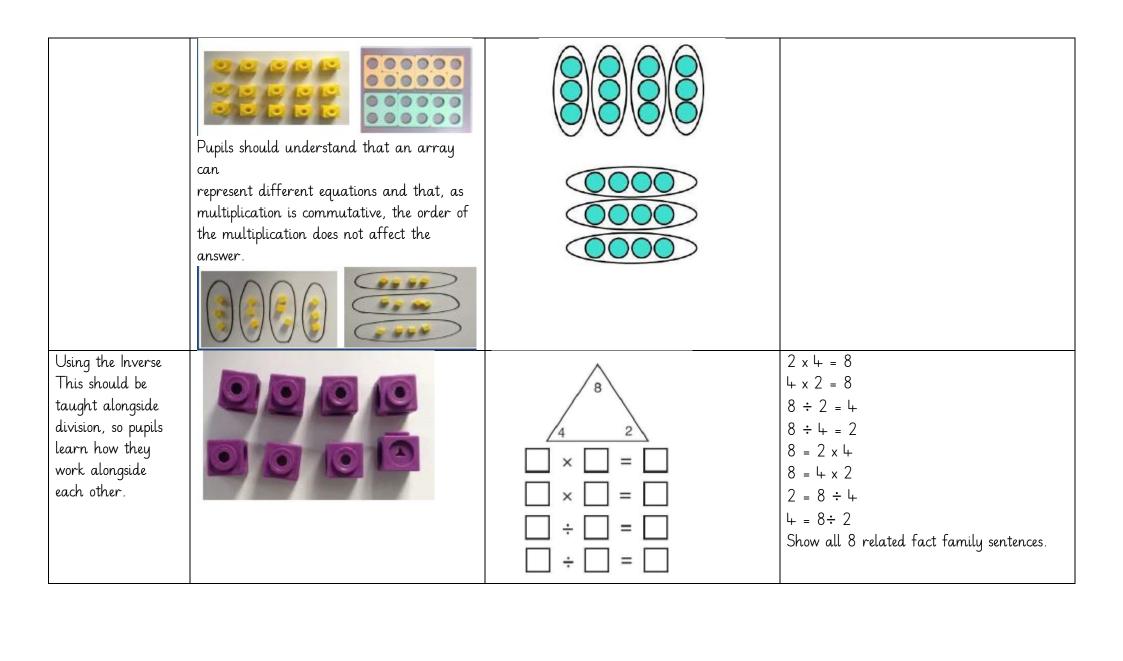

# Multiplication

	Concrete	Pictorial	Abstract
Doubling	Use practical activities using manipulatives including cubes and Numicon to demonstrate doubling	Draw pictures to show how to double numbers  Double 4 is 8	
	double 4 is 8  4 × 2 = 8  + = = = = = = = = = = = = = = = = = =		

	Concrete	Pictorial	Abstract
Doubling	Use practical activities using manipulatives including cubes and Numicon to demonstrate doubling	Draw pictures to show how to double numbers  Double 4 is 8	Partition a number and then double each part before recombining it back together.  16
	double 4 is 8 4×2=8  + = = = = = = = = = = = = = = = = = =		$ \begin{array}{cccccccccccccccccccccccccccccccccccc$
Counting in multiples	Count the groups as children are skip counting, children may use their		Count in multiples of a number aloud.  Write sequences with multiples of
(2s, 5s, 10s)	fingers as they are skip counting.		numbers.
		Children make representations to show counting in multiples.	2, 4, 6, 8, 10
		2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	5, 10, 15, 20, 25 , 30
Making equal groups and		Draw (1) to show 2 x 3 = 6	2 X 4 = 8
counting the total	□ x □ = 8  Use manipulatives to create equal groups.	Draw and make representations	

	Concrete	Pictorial	Abstract
Doubling	Model doubling using dienes and PV counters.  40 + 12 = 52	Draw pictures and representations to show how to double numbers	Partition a number and then double each part before recombining it back together.  16 10 6 12 20 + 12 = 32
Counting in multiples of 2, 3, 4, 5, 10 from 0 (repeated addition)	Count the groups as children are skip counting, children may use their fingers as they are skip counting.  Use bar models.  5+5+5+5+5+5+5=40	Number lines, counting sticks and bar models should be used to show representation of counting in multiples.  3 3 3 3 3	Count in multiples of a number aloud. Write sequences with multiples of numbers. 0, 2, 4, 6, 8, 10 0, 3, 6, 9, 12, 15 0, 5, 10, 15, 20, 25, 30 4 × 3 =
Multiplication is commutative	Create arrays using counters and cubes and Numicon.	Use representations of arrays to show different calculations and explore commutativity.	12 = 3 × 4 12 = 4 × 3

#### Division

	Concrete	Pictorial	Abstract
Division as sharing	I have 10 cubes, can you share them equally in 2 groups?	Children use pictures or shapes to share quantities.  8 shared between 2 is 4  Sharing:  12 shared between 3 is 4	12 shared between 3 is 4
Division as sharing	I have 10 cubes, can you share them equally in 2 groups?		

	Concrete	Pictorial	Abstract
Division as sharing	I have 10 cubes, can you share them equally in 2 groups?	Children use pictures or shapes to share quantities.  8 shared between 2 is 4  Sharing:  12 shared between 3 is 4	12 shared between 3 is 4
Division as sharing	I have 10 cubes, can you share them equally in 2 groups?	Children use pictures or shapes to share quantities.  8+2=4  Children use bar modelling to show and support understanding.	12 ÷ 3 = 4

	Concrete	Pictorial	Abstract
Division as	Use cubes, counters, objects or place value	Continue to use bar modelling to aid solving	How many groups of 6 in 24?
grouping	counters to aid understanding.	division problems.	24 ÷ 6 = 4
	24 divided into groups of 6 = 4	20 ? 20 ÷ 5 = ?	
	96 ÷ 3 = 32	5 x ? = 20	
Division with		Draw an array and use lines to split the	Find the inverse of multiplication and
arrays		array into groups to make multiplication and	division sentences by creating eight linking
		division sentences.	number sentences.
			$7 \times 4 = 28$
			4 x 7 = 28 28 ÷ 7 = 4
	Link division to multiplication by creating		28 ÷ 4 = 7
	an array and thinking about the number	00000	28 = 7 x 4
	sentences that can be created.		28 = 4 x 7
	Eg 15 ÷ 3 = 5 5 x 3 = 15		4 = 28 ÷ 7
	15 ÷ 5 = 3 3 x 5 = 15		7 = 28 ÷ 4
